DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: #64 (as per paragraph 030, line 6). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1,4-8,16 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (USP 6,105,196) in view of Borchers et al (USP 5,946,780). The patent to Chang discloses a spherical bathing sponge (10) formed by forming a mesh tube (12) into a band by stretching it onto a pair of spaced apart posts (24,26) (claims 4-5) and securing the band at two spaced apart locations (by the cords 14 and 16) (claim 6) so as to produce a substantially spherical sponge. The patent to Chang discloses the invention substantially as claimed with the exception of the formation of plural bands. The patent to Borchers teaches both the use of a single band (see fig 1) as well as plural bands (9 and 10 in fig 4). It would have been obvious to one of ordinary skill to have modified the device of Chang by using more than one band for the

same reason(s) set forth at column 4, lines 59-64 of Borchers. The patent to Borchers discloses the use of a fastening device (6) for a cord (7) as in claim 7 and one of ordinary skill would deem it obvious to use such a means for the cords (14,16) to securing retain them in place. The ring (18) as well as the ribbon (30) read on the "object" recited in claim 8. The use of "four or more" bands (claim 20) or any number of bands is taught by Borchers at column 4, lines 61-64.

Allowable Subject Matter

4. Claims 9-15 are allowed.
5. Claims 2,3 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Kingman discloses the formation of a single doughnut-shaped mesh scrubber.
